THE CERAMIC COMPANY

DRY LAYING ON GRASS, SAND AND GRAVEL

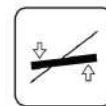

The installation without the use of adhesives and putties on the substrate allows you to create walkways that can be immediately walked on and perfectly integrated with the environment. The absence of expansion joints makes this type of installation particularly suitable also on extended surfaces, giving even more homogeneity and continuity to the flooring.

QUICK AND EASY TO INSTALL EVEN WITHOUT THE INTERVENTION OF SPECIALIZED STAFF

EASY DRAINAGE OF RAINWATER THANKS TO THE LEAKS BETWEEN ONE TILE AND THE OTHER

AVOID PROBLEMS RELATED TO SETTLEMENT

REUSABLE, EASILY REPLACEABLE OVER TIME AND REPLACEMENT WITHOUT MASONRY WORK

LOWER INSTALLATION TIMES AND COSTS
